Professional Experience:

Retail Insights LLC | March 2022 - Present

Full Stack Software Engineer II

Lead development on and maintained multiple of the companies clients' internal and client facing platforms & tools. Some of the modules include Consumer & Rx drug pricing, promotion and deal bidding. Trade Show registration systems, new supplier setup & submission, compliance form handling and more. I also developed many internal tools and development packages that are shared between the different systems.

Laravel, PHP, Livewire, Blade, HTML, SASS, Javascript, JQuery, MySQL, AWS, Bootstrap, Vue Js 3, Rest APIs, Workflows, Jira, Github etc.

Delivery Circle | June 2020 - February 2022

Full Stack Software Engineer

Worked on an agile team to develop new features, fix bugs and make improvements to the company's core product, a last-mile logistics order management system. Developed features including Driver Payout Dashboards, Invoice Details and Delivery Compliance Reporting, User Status Filters and Profiles, Google Secret Manager integration and more.

Laravel, PHP, Blade, HTML, Bootstrap, Javascript, JQuery, MySQL, PHPUnit, Laravel Dusk

Projects:

Many more available at <https://github.com/kyleneotfound>

Song Ranker <https://www.song-rank.com>

A web application that allows a user to log in with their spotify account, search for a music artist and rank that artist's discography, a particular record or EP or tracks. It allows you to find out what your favorite songs are, in order and share your results with friends.

Laravel, PHP, Blade, Bootstrap, MySQL, Vue3, PHPUnit, Laravel Vapor, Laravel Socialite, AWS Lambda

SDP Tracker <https://www.sdp-tracker.com>

A Laravel application made for the Sleep Deprived Podcast. The sleep deprived podcast contains a weekly segment where the podcast members have a debate or a discussion about a particular topic. This application tracks the discussions from week-to-week and allows users to view the data from prior episodes.

Laravel, PHP, Blade, Bootstrap, MySQL, AWS

SLSB (work in progress)

A website/blog/subreddit for video game enthusiasts on twitch.tv. Allows users to sign in with their twitch account and follow, like, comment and interact with twitch streamers they enjoy. You can customize your profile to include things like your favorite twitch categories, computer specifications, links to other social media accounts and much more to come. This application is still under development and is the biggest solo undertaking of a project I work on from time to time.

Laravel, PHP, Blade, Bootstrap, MySQL, AWS, javascript, JQuery, Vue3, Laravel Socialite

Technical Skills:

PHP, Java, Python, HTML, CSS, SASS, Bootstrap, Tailwind, Javascript, JQuery, Vue3, NodeJS, NPM, Vite, Laravel, Livewire, Blade, SQL, MySQL, Composer, Git, Github, AWS, Jira, Trello, Ubuntu, Bitbucket, Postman, Django, VS Code, Unit Testing, TDD, MVC, REST, Workflows, Database Migrations, Pair Programming, Team Programming, Technical Writing
