Technical Skills:

Languages: PHP, Java, HTML, CSS, Javascript, Python, SQL
Frameworks: Laravel, Blade, Vue Js, Bootstrap, JQuery, Django
Tools: Visual Studios, Visual Studio Code, Git, Github, Bitbucket, Putty
Linux, MySQL Workbench, Postman
Additional Experience: Pair Programming, Team Programming, Technical Writing,
Database Migrations, Unit Testing, Laravel Dusk, MVC

Professional Experience:

Delivery Circle | June 2020 - February 2022

Full Stack Software Engineer

Worked on an agile team to develop new features, fix bugs and make improvements to the company's core product, a last-mile logistics order management system. Developed features including Driver Payout Dashboards, Invoice Details and Delivery Compliance Reporting, User Status Filters and Profiles, Google Secret Manager integration and more.

Laravel, PHP, HTML, Bootstrap, Javascript, JQuery, MySQL, PHPUnit, Laravel Dusk

Projects:

Many more available at <https://github.com/kyleneotfound>

PhoneProPlus

A digital living Phonebook and contact backup solution. Search a public database of address and phone records. Create an account or log in with google to create your own records, save records to your profile and backup your contact list.

Laravel, PHP, HTML, Blade, Bootstrap, Javascript, JQuery, MySQL

Tattery

An Instagram/Pinterest hybrid web-based social media application. A user can create posts of their tattoos, where they got the tattoo at and more. This web-app also served as a way for me to teach other aspiring software engineers basic front and back end web development with Laravel. Laravel, PHP, HTML, Blade, Bootstrap, CSS, Javascript, JQuery, Vue, MySQL

Education:

Rowan University | Computer Science B.S | **4.0** (Expected Graduation: May 2022)
