Kyle Evangelisto

kyleevangelisto@gmail.com   **kyleevangelisto.com**   **github.com/kylenotfound**

Technical Skills:

Languages:	PHP, Java, HTML, CSS, Javascript, Python, SQL
Frameworks:	Laravel, Blade, Vue Js, Bootstrap, JQuery
Tools:	Visual Studios, Visual Studio Code, Git, Github, Bitbucket, Putty Linux, MySQL Workbench
Additional Experience:	Pair Programming, Team Programming, Technical Writing, Database Migrations, Unit Testing, Laravel Dusk, MVC

Professional Experience:

Delivery Circle | June 2020 -
Full Stack Software Engineer

Worked on an agile team to develop new features, fix bugs and make improvements to the company's core product, a last-mile logistics order management system. Developed features including Driver Payout Dashboards, Invoice Details and Delivery Compliance Reporting, User Status Filters and Profiles, Google Secret Manager integration and more.

Laravel, PHP, HTML, Bootstrap, Javascript, JQuery, MySQL, PHPUnit, Laravel Dusk

Projects:

Many more available at https://github.com/kylenotfound

TwetShorter
A clone of "Twit Longer" with a unique twist being that a user can only create "Twets" of 24 characters or shorter. Supports Login via github google and twitter using Laravel Socialite.
Laravel, PHP, HTML, Blade, Bootstrap, Javascript, MySQL

Tattery
An Instagram/Pinterest hybrid web-based social media application. A user can create posts of their tattoos, where they got the tattoo at and more. This web-app also served as a way for me to teach other aspiring software engineers basic front and back end web development with Laravel.
Laravel, PHP, HTML, Blade, Bootstrap, CSS, Javascript, Vue, MySQL

Education:

Rowan University | Computer Science B.S | **4.0** *(Expected Graduation: May 2022)*
